

GET READY GUIDE

PRESENTED BY Haier

IT'S GOOD TO TRY

When you TRY, you find out more. About the world, about other people, about yourself. What you like and what you don't. What you can do - you might surprise yourself! How fast you can go. How far you can go. Trying can be easy, or hard. Exciting or scary. Sometimes you might wonder why you're trying at all. Doesn't matter. Just give it a whirl. Get stuck in and you'll grow stronger. Better to have a go than be a no-show. Go on, have some fun! TRY it, enjoy it, experience everything you can. 'Cos if you don't TRY, you'll never know.

So go on, give it a TRY.

CONGRATULATIONS

on entering the Weet-Bix Kids TRYathlon!
We can't wait to see you!

WHAT TO EXPECT

The TRYathlon has been designed to encourage **PARTICIPATION** and **FUN**, so as long as you've got the right **ATTITUDE** you'll be ready to give it a TRY.

The TRYathlon involves three separate legs: **SWIMMING, BIKING, AND RUNNING**, one after the other.

Each leg varies in length and the distances vary depending on how old you are.

So you can get the most out of your experience, we have put together this Get Ready Guide which outlines:

- **EVENT DETAILS**
- **TRAINING TIPS & PROGRAMME**
- **WELLBEING TIPS**

EVENT DISTANCE

	6yrs	7yrs	8-10yrs	11-15yrs
	50M	50m	100m	200m
		4kM	4kM	8kM
	1.5km	1.5kM	1.5kM	1.5kM

Did you know that over **450,000 KIWI KIDS** have completed the Sanitarium Weet-Bix Kids TRYathlon since it began in 1991 and it is the largest under 16 Triathlon in the world!

YOUR TRYATHLETE PACK

Before or at the event you will receive a TRYathlete pack that includes:

*Official Event T-Shirt + Bib Number Sticker + Swim Cap +
Drawstring Bag + And Goodies from our Sponsors*

Your TRYathlete pack will either be delivered to you by courier or you will collect this on the day, depending on what option you selected when you entered.

Haier TRAINING PLAN

It's a good idea to do some training in the weeks leading up to the TRYathlon. Following a simple training plan will help ensure that when the event day comes around you are well prepared and can make the most of the day.

You can create your own training plan on the next page or you can download the Weet-Bix TRYTR@INER Plan at tryathlon.co.nz/training/try-trainer

THERE ARE 3 TO CHOOSE FROM:

1. **Beginner** – recommended for 6-9 year olds
2. **Moderate** - recommended for 10-12 year olds
3. **Advanced** - recommended for 13 and above

TOP TIPS FOR YOUR TRAINING PLAN

1. Make sure your training plan is achievable and that you can fit it in to your week.
2. Do regular, small activities to build your fitness and confidence.
3. Try to swim, bike, and run at least once each week.
4. Remember to practice transitioning from each activity too.
5. Share and agree on your training plan with your family.
6. Put it on the fridge or on your bedroom wall, so you know what you need to do each day.

WEEK 1							
WEEK 2							
WEEK 3							
WEEK 4							

TRAINING TIPS

1. WARM UP

Make sure to stretch your muscles before you begin to exercise to help prepare your body and prevent injury.

Start with a short warm-up first, such as walking or jogging in place or even some dancing to your favourite song.

If you want a video warm-up to follow along to check out Weet-Bix Guy's Warm up below!

<http://bit.ly/TRYWARMUP>

2. GET FAMILAR WITH YOUR GEAR

It is a good idea to practice in the clothes and gear you will use on the day. Especially if you are not use to biking or running in your togs. Make sure you can tie your shoe laces and buckle up your helmet too.

3. HAVE FUN

Have fun while you train. Turn your training into a game or plan to train with friends or your family – it's a lot more fun when everyone is involved.

4. GET CREATIVE

If you can't train for a reason then come up with some creative ways to get your training in, like running around the house for 5 minutes. Remember that even playing or running around with friends, or going biking together as a family still counts.

5. BE SUN SMART

If you are out training in the sun then don't forget to wear a hat and apply sunscreen. It's a good idea not to train in the heat of the day. So in the morning or after school is a good idea.

6. DON'T OVER TRAIN

It's important not to over-train because you can become tired, injuries might even occur and you won't be at your best. It's important to have rest days too.

7. ALWAYS PUT SAFETY FIRST

The highest priority should always be your safety no matter what the activity. A safe bike, a good pair of running shoes, and always wearing a helmet that fits is important. During training, supervision is important – especially if you are swimming. Using parks and fields and areas away from traffic are the safest places to practice.

8. PACE YOURSELF

It is important to learn how to pace yourself. The TRYathlon is not a sprint! Pacing means not using all of your energy at the beginning so you can finish strong without having to stop because you are too tired.

9. REMEMBER TO WARM DOWN

When you finish training for the day, it's just as important to cool down and stretch again to help your muscles recover.

SWIM TIPS

TOP TIPS:

1. Have a good pair of goggles that are comfortable and don't leak.
2. Make sure you practice the distance you need to swim in the TRYathlon in training.
3. Practice swimming where your TRYathlon is being held – if it's a beach, practice swimming in the sea.
4. Always try and pace yourself.
5. Practice your freestyle or an easy breaststroke.
6. Make sure you have some fun when you are training – go for a 5 or 10 minute swim then play for 30 minutes.
7. Remember if you are ever in the water and start to panic all you need to do is roll onto your back and float, and if in a pool, just grab onto the lane rope and only swim if you are supervised by an adult or lifeguard.

CHOOSING THE RIGHT GOGGLES FOR YOU:

1. Make sure they are the right size for your face - If they suction onto your face without the strap perfect!
2. Make sure they are comfortable.
3. Are they a cool colour? (It makes you go faster!!)

CYCLE TIPS

FINDING THE RIGHT BIKE FOR YOU

1. Purchase your bike from a trusted bike store (like 99 bikes) - It will ensure the bike is fitted and set up correctly.
2. Find the right size bike - Getting the bike which is the right fit is crucial to your safety. Bikes that are too large, can prevent you from touching the ground and hands from reaching the hand brakes. Bikes that are too small, force you to pedal awkwardly!

GET YOUR BIKE CHECKED

Your bike needs to be kept in good condition. If you are entering the TRYathlon it's a good idea (and we strongly recommend) you get your bike and helmet checked prior to the event.

TOP TIPS:

1. USE YOUR HEAD

- Always wear a helmet!
- Riding a bike is fun but safety must always come first.
- Practice putting your helmet on and taking it off.
- Your helmet must fit properly and comfortably. You don't want it too small or too big. The helmet straps must be tight. A good test is putting two fingers above the eyebrows. The top of the helmet should be touching the top finger. Check this every time you ride.

2. DON'T FORGET YOUR GEAR:

Take a water bottle and make sure you wear sunscreen. Don't overload yourself with heavy items that could affect your balance.

3. PACE YOURSELF:

Don't start off your ride too fast or you will tire yourself. Try to keep a consistent pace throughout.

4. BE CAREFUL:

Always follows the road rules and keep to the left hand side of the road. If possible practice where there is not a lot of traffic. Keep an eye on the road ahead of you and watch out for other cyclists and road users.

RUNNING TIPS

TOP TIPS

1. If you haven't done a lot of running then start off on a small run, around the block or one lap of the park or school field and then slowly build up. You will be surprised at how quickly you improve. Train with others to make it more fun. The time always goes faster when you have someone to talk to!
2. Mix it up – don't do the same run all the time, find some new routes, find some stairs to run up, or do some sprints.
3. Pace yourself. Don't run too fast at the start or you might get a stitch.
4. Always keep yourself hydrated, before, during and after your run.
5. If you do get a 'stitch', slow down or walk for a bit, take long breaths, and place a hand on the area that is sore.
6. Have a positive mind set – there may be times when you feel it's too hard, prepare yourself with positive thoughts and self-talk to help you get through it. For example: "I am, I can, I will" and "breathe, believe, achieve".
7. Most of all have FUN!

"Here are some great tips from ASICS and Podiatry NZ to help you prepare for the Kids TRYathlon."

"I hope you can use some of the advice on this page to educate your child and encourage them to give physical activity a TRY."

FINDING THE RIGHT SHOE FOR YOU:

1. Make sure the shoes fit well – they shouldn't be too tight or too loose, they should give your feet the perfect hug.
2. Get the correct support your feet need – does your foot roll inward or outward when running? To find out make sure you are fitted by a sales assistant and have your foot checked. Getting the right support will help you protect your feet and stay safe when enjoying your run.
3. Make sure they are comfortable – really concentrate on how your feet feel before you buy them. Is your toe pushing up against the shoe, or your heel rubbing at the back?

TRANSITION TIPS

The most unfamiliar part of TRYathlon is the transition between legs. This is where you need to go from swim to bike and bike to run.

It is important to practice the transition beforehand to get your body used to doing a different activity straight away as it uses different muscles and you'll need to practice getting changed into the right clothing for the next leg. Practicing the transitions will improve the chances that it will all go smoothly on the day.

MAKE SURE YOU PRACTICE HOW YOU'RE GOING TO CELEBRATE AS YOU CROSS THE FINISH LINE TOO!

<p>Swim - Run</p>	<p>For the swim to run you could practice this at the swimming pool or beach or you could even try this at home, by running around under the sprinkler.</p>
<p>Run - Bike</p>	<p>For the run to bike you should get used to drying yourself, putting your socks, shoes and helmet on and getting on and off your bike.</p>
<p>Bike -Run</p>	<p>For the bike to run you could try biking for a few minutes and then go for a run straight after. Sometimes when you hop off your bike and start running your legs can feel a bit like jelly!</p>

Weet-Bix™ NUTRITION TIPS

Eating wholegrains like Weet-Bix and lots of yummy fresh fruits and vegetables will give your body the nutrients and energy it needs.

They also have lots of vitamins and minerals that your body needs to be strong and healthy!

--Stay away from foods that are high in fat, salt and sugar; these foods usually don't have a lot of nutrients.--

For some great breakfast ideas check out the Better Brekkie recipes on the Weet-Bix website at weetbix.co.nz

HEALTHY EATING WILL HELP MAKE SURE THAT YOU HAVE THE ENERGY YOU NEED TO TRAIN!

WATER!

As you train, make sure you drink plenty of water, to avoid getting dehydrated. Your body needs fluid to work well.
